Dr. T. Kamaraj

Organising Secretary

Dr. K.S. Jeyarani Kamaraj

Organising Chairman

Greetings from Aakash !!

The science of infertility is fast advancing and needs thorough counseling and management. In the recent days, hundreds of clinics have been opened in India that specializes exclusively in infertility treatment. Only twenty percent of childless couples consult specialized centres due to various reasons. Other eighty percent make protocol visits to consult their family physicians and Gynecologists who treat them for a certain period before referring them to specialists.

Again at any given time thousands of medicos having post graduate degrees in Obstetrics and Gynecology enter into active practice every year. One or two out of ten patients in their practice have genuine problems of infertility-apprehensive couple, eager to conceive a child. Busy practice gives them less time in updating the knowledge of treatment modalities available for treating patients with infertility. Our rich experience of twenty four years in the field of treating childless couples has made us understand the dire need for an initial infertility management protocol for all Gynecologists.

Ferticon offers a platform for gaining knowledge by productive interaction between the experts and practitioners in the field of Obstetrics and Gynecology. Expertise Faculty's knowledge and experience in the field of Reproductive Medicine and Obstetrics & Gynecology would greatly benefit the postgraduates and the practicing Obstetricians and Gynecologists attending this conference.

On behalf of the organizing committee and the expert faculties of Ferticon, may I request you to participate and help us in our mission to update the knowledge in the field of Reproductive medicine.

Dr.K.S.Maheswari

Treasurer
